SOS/Panic Button
Simple & Efficient Device

Ti-Prime 300 Small & Powerful

The Ti-Prime 300 is a great all round tracking device, featuring its robust design and real-time accurate tracking makes it the perfect option for leaflet distribution.

This device features built in motion sensors meaning the device will conserve battery when not in use. Included in the device is a built in memory allowing positions to be stored even when not in use.

There is also a panic button on the device, when triggered it can be set to send email/SMS alerts.
